

Clearance & Installation Guide

Planning notes for freestanding folding screens in villas, hotels, foyers, and majlis interiors.

Site measurements

Confirm room width, ceiling height, final placement zone, door swing, furniture clearance, and whether the screen will be used flat, angled, or partially folded.

For large screens, confirm elevator dimensions, doorway clearances, corridor turns, loading bay access, and the consignee mobile number before shipment planning.

Placement guidance

Use case	Planning note
Entryway	Place the screen to soften the front-door view without blocking circulation.
Living room	Use behind-sofa or open-plan placement to shape a visual zone without construction.
Villa foyer	Allow enough floor depth for a gentle angled fold and a refined first impression.
Hotel suite	Confirm guest circulation, luggage path, housekeeping access, and sightlines.
Majlis	Use the divider to define conversation zones while preserving openness.

Care and handling

Freestanding screens should be positioned on stable indoor flooring. Avoid abrasive tools, strong chemicals, and prolonged moisture exposure.

Dust with a soft dry cloth. For delicate paper or art-led panels, avoid wet cleaning unless confirmed for the specific finish.
